

Professional Wireline Simulator

A revolutionary, professional-grade simulator that brings precision and reliability to testing and validating E-line and wireline systems. With adjustable settings spanning from **5,000 to 40,000 feet** and **support for all major wireline types**, it's the ultimate tool for wireline operations.

Key Features:

- **High-Power Capability**
 - Maximum 500V DC input voltage
 - Sustained 3A current with 10A peak surge capability
 - Live voltage & current sensing
- **Professional-Grade Design**
 - Ruggedized, portable construction
 - Digital LCD display
 - Selection locking feature for testing integrity
 - Coaxial cable connectors for mono conductor wireline
- **Precision Control**
 - 8 precise settings from 5,000 to 40,000 feet
 - Real-time power and status monitoring
 - Built-in safety features with locking mechanism

Why Choose BlackFrac?

The BlackFrac Wireline Simulator combines professional-grade construction with precise control and comprehensive safety features. Whether you're testing at 5,000 or 40,000 feet, our wireline simulator delivers reliable, accurate results every time.

Supported Wireline:

FTH Series:

- 1-R-224-FTH 7/32"
- 1-R-258-FtH 1/4"
- 1-R-288-FTH 9/32"
- 1-R-322-FTH 5/16"

FP35 Series:

- 1-R-224-AD-MP35 7/32"
